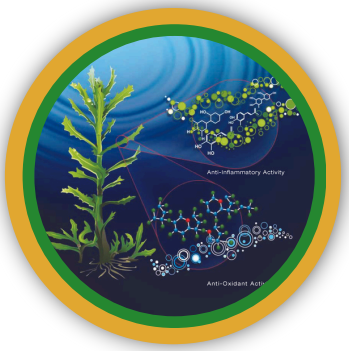
EMPOWERING NATURAL SKIN HEALTH

Innovating Botanical Solutions

Nature's Solution for functional Skin Care
Sustainability, Purity, Effectiveness, Integrity



INTRODUCING A NEW GENERATION OF ASTERACEAE ACTIVES

The Asteraceae (Daisy) family is one of the world's most respected plant families in traditional medicine and modern skin science. For centuries, its members have been used to soothe inflammation, support wound repair, calm irritation, and restore skin balance. At Bio Actives Export, we harness this legacy through advanced biotechnology, transforming medicinal plants into high-performance, evidence-based skincare actives.

Plants within the Asteraceae family are naturally rich in anti-inflammatory, antioxidant, antimicrobial, and regenerative compounds, making them ideal for modern skin health applications. Well-known members include Calendula, Chamomile, Echinacea, achillea (Yarrow) and Arnica. At the forefront of this family is Centipeda cunninghamii, a unique Australian native with exceptional skin-healing potential. Through seed-to-shelf control, patented extraction technology, and TGA-certified manufacturing, Bio Actives Export delivers Plantolin®,a full-spectrum extract that captures the complete bioactive profile of this powerful Asteraceae species. Plantolin® represents the evolution of medicinal Asteraceae for modern skincare.

A Natural SYNERGY of Science & Nature In One UNIQUE AUSTRALIAN EXTRACT

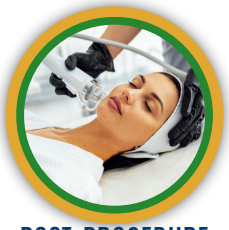
COSMETIC BENEFITS OF PLANTOLIN®

The novel extract contains scientifically validated skin healing, cell renewal and therapeutic properties. A combination of powerful dual-action active components provide a synergy of anti-inflammatory and anti-oxidant activities to help tackle skin conditions by stimulating cell regeneration.

ACNE
Anti-Bacterial
Anti-Acne Activity

ROSACEA
Anti-Microbial and
Anti-Inflammatory

ANTI-AGING
Anti-Oxidant Retinol
Replacement Benefits



POST-PROCEDURE
Cell Renewal Properties
Repair Damaged Skin

WOUND HEALING
Cellular Regeneration
Promoting Healing

ECZEMA/DERMATITIS
Anti-Irritant and
Healing Properties

PSORIASIS
Increases Skin Cell
Proliferation

SENSITIVE SKIN
Gentle & Effective
Safe for Sensitive Skin

As a full spectrum extract, it contains the complete suite of phytochemicals needed to protect cells from oxidative damage, coupled with powerful broad acting anti-inflammatory activity. Rapid reduction of inflammation allows the skin to heal more efficiently minimising scarring and skin damage by promoting cell renewal and encouraging healthy cell proliferation. By eradicating free radicals and inflammation, our extract causes the skin layers to regenerate from deep within the dermis to restore, redefine and renew the outer layers, thereby treating the skin condition. Plantolin® is not only effective but safe and non-toxic, making it suitable for all skin types, including sensitive skin, providing a unique ingredient in dermatologic applications.
