Experience the Unique Plantolin® Difference for more Youthful Looking Skin

RETINOL-LIKE BENEFITS FROM A MEDICINAL PLANT FAMILY

The future of anti-aging skincare is natural, effective, and gentle. Plantolin®, derived from the Australian Centipeda cunninghamii (Asteraceae/Daisy), delivers visible skin renewal benefits similar to retinol, without the irritation, photosensitivity, or Vitamin A toxicity. The Natural path to ageless skin is here. As the demand for natural and effective skincare continues to rise, Plantolin® emerges as the ideal alternative to ingredients such as retinol, offering the benefits of retinol, including wrinkle reduction and skin renewal, but without the associated risks.

WHY ASTERACEAE FOR SKIN RENEWAL?

Medicinal Asteraceae plants are known for their ability to:

- Support cell regeneration
- Reduce inflammation-driven aging
- Protect against oxidative stress
- Improve skin elasticity and texture

A natural alternative to retinol that delivers visible results without compromise. Transform your skincare offerings and meet the growing demand for clean, green beauty solutions.

RETINOL-LIKE BENEFITS NATURALLY

Plantolin® delivers powerful and effective anti-aging effects with similar skin renewing benefits as Retinol/Vitamin A but without the risk of dryness, irritation, or sensitivity to UV light. It helps improve skin tone, elasticity and promotes skin cell proliferation making it perfect for natural skincare solutions.

GENTLE AND EFFECTIVE SOLUTIONS

Unlike Retinol based ingredients, Plantolin® is gentle on the skin, causing no photosensitivity or Vitamin-A toxicity, making it safe for daily use, even in sunlight. Results are achieved with potent concentrations as low as 0.5% to 5%, avoiding the risks linked to higher Retinol concentrations,

THERAPEUTIC SKIN HEALTH ALTERNATIVE

Plantolin® supports overall skin health by reducing inflammation, combating microbial threats, and enhancing moisture retention. Made from sustainably sourced natural ingredients, Plantolin® aligns with the rapidly growing consumer demand for effective environmentally conscious and skin-friendly products.

THE FUTURE OF ANTI-AGING SKINCARE

INTRODUCING PLANTOLIN
THE ESSENCE OF NATURE IN SKINCARE

Plantolin® concentrates these benefits into a single, multifunctional active.

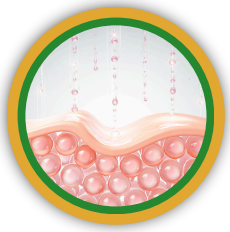
Anti-Aging Benefits

- ✓ Improves skin tone and elasticity
- ✓ Supports collagen-friendly pathways
- ✓ Promotes healthy skin cell renewal
- ✓ Helps reduce fine lines and visible aging
- ✓ Gentle enough for daily, year-round use

A SMARTER ALTERNATIVE TO RETINOL

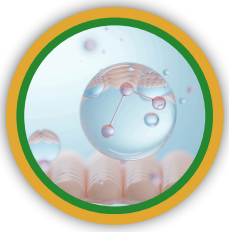
- Effective at low concentrations (0.5–5%)
- No photosensitivity
- Suitable for sensitive and mature skin
- Aligns with clean, natural, and regulatory-ready formulations

Plantolin® offers the power of medicinal plants — refined for modern anti-aging skincare.



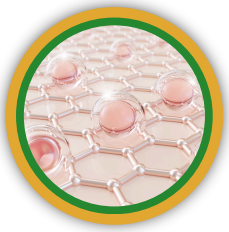
CHLOROGENIC ACID

Supports Collagen Production.
This Polyphenol active compound is a key anti-oxidant for reducing the appearance of wrinkles and the signs of aging by supporting collagen production which is the powerhouse protein responsible for skin's firmness and elasticity It stimulates tired skin, restoring balance and radiance.



LIGNINS

Maintain Youthful Skin.
Potent anti-oxidant properties reduce the appearance of wrinkles and fine lines, by neutralising free radicals to eliminate oxidative stress that lead to premature aging. Lignins are also powerful anti-inflammatories, which can help calm the skin and can help retain moisture to improve hydration and elasticity, which are crucial for maintaining youthful skin.



METHOXY FLAVONES

Improves Skin Elasticity.
This compound enhances skin elasticity, making the skin appear firmer and also calms skin, reducing redness and promoting an even skin tone. It also supports skin moisture retention, which is crucial for maintaining a smooth and hydrated complexion.
