HENRY LAMOTTE OILS

Passionate about Oils

We supply and produce high quality oils and related products – directly from nature's bounty.

We serve our customers in the sectors food, cosmetics, pharmaceuticals, animal nutrition and care and the chemical and technical industry with almost 100 years of expertise.

Our mission is to be the leading quality supplier and your trusted partner.

filled with passion
SINCE 1925

Products of the highest quality from A to Z

Quality is not a matter of chance – it is the result of our day-to-day efforts to meet both your and our high standards for safe products. We carry out continuous checks throughout the value chain and regular product inspections to ensure the best quality.

For us, quality means:

- Proven product safety
- Careful selection of ingredients
- Supplier qualification
- Transparent product traceability
- Responsibility for people and the environment
- Teamwork

Our certifications

DE-ÖKO-003

MSC-C-54612

ASC-C-00693

2-0216-11-100-00

Our quality team works hard to ensure your satisfaction and confidence in our products. By listening to what our customers want and need, we make sure our products meet the highest standards. We continually optimise our manufacturing processes by visiting our partners at the origin of our raw materials.

CLAUS-MICHAEL BRIEBER,
HEAD OF QUALITY & DEVELOPMENT

Our Code
of Conduct

Our foundation on sustainability

Sustainability is firmly embedded in our corporate DNA. It shows in the careful use of natural resources, long-term partnerships with equitable partners, and our responsibility for people along our value chains.

Reliable.

We are a reliable, close partner for our customers and suppliers.

- Long-term and resilient business relationships
- On-site visits to suppliers, own audits
- Code of Conduct “Value creation with appreciation“
- Supplier questionnaires and assessment
- Supply chains which demonstrably comply with social standards

Diverse.

Our broad product range offers a variety of added value in sustainability.

- Natural raw materials, vegan product alternatives
- Projects at the raw materials’ origin
- Community-based product line
- Own oil mill in Bremen
- Products related to upcycling
- Promotion of variety in agriculture
- Product certifications, for example EU-bio, Naturland, Rainforest Alliance, RSPO, MSC

Responsible.

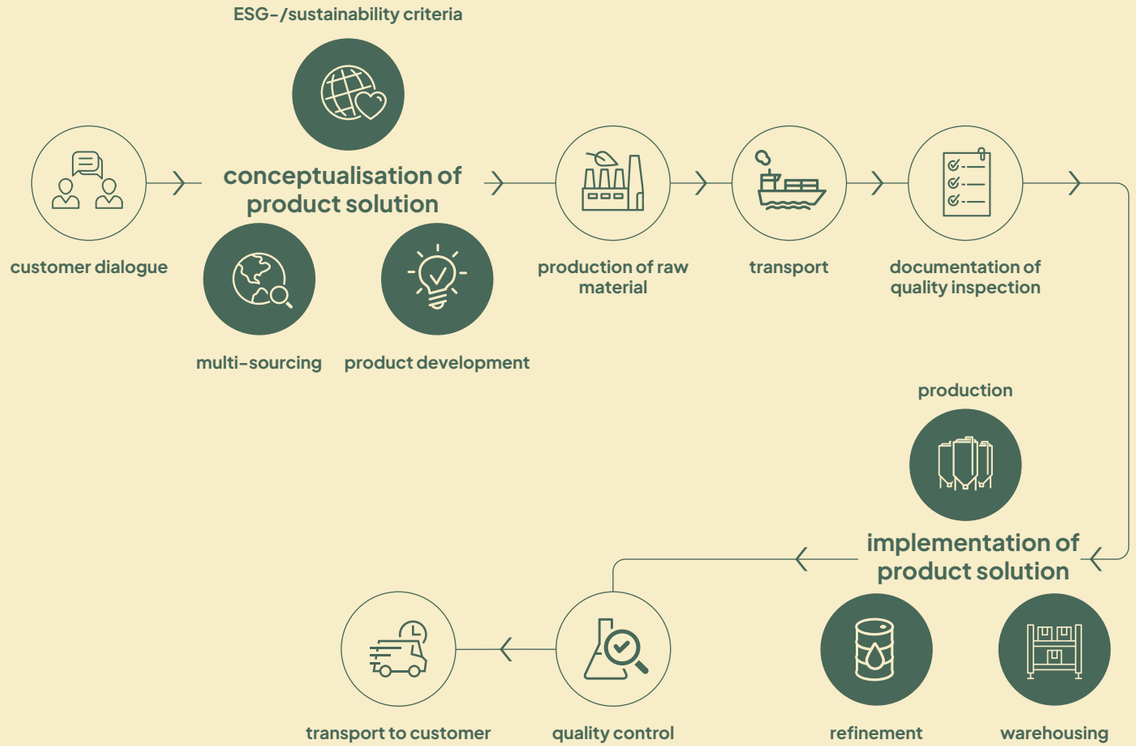
With us, sustainable corporate management is tangible.

- Participation opportunities for employees, fair remuneration
- Bees on our site, looked after by employees
- Green electricity at the company headquarters
- Corporate Carbon Footprint
- ISO 14001 certification, SMETA audit, EcoVadis silver rating, amfori BSCI member, „excellent family-friendly“ seal

Supply Chain Management

We source our natural raw materials from around 50 countries. In times of fluctuating prices, availability and quality, our strategic supplier management keeps you on the safe side.

- High delivery capability
- Long-term partnerships
- Regular visits to our suppliers in the raw material origins
- Transparency and traceability
- Risk minimisation through multi-sourcing strategy
- Internal and external audits for certified quality



Product development

Want to expand your brand range? We're here to help you! We turn innovative ideas into high quality products by following the latest market trends. Let us work with you to find the right taste, consistency or functionality for your unique product.

- Individual consultancy
- Researching and testing functionality & regulatory requirements
- Developing prototypes & providing samples
- Regular audits for certified product safety

Success driven by innovation

Making sure your product idea doesn't just stay an idea. Based on your vision, our team will develop a product design, create samples and meet your individual product specifications. Working with you, our development team will find the perfect blend with the right flavour components, the desired consistency and a long shelf life. Get inspired by our wide range of products!

Foods

Explore our range of natural ingredients: they provide functional nutrients such as essential fatty acids and proteins, as well as unique tastes, colours and flavours.

Quality products to suit all tastes

Our range offers vegan options, locally sourced products and oils with functional nutrients for balanced diets. Find suitable ingredients for meat alternatives and convenience products, bakery, confectionery, sauces, delicacies, cereals, spreads, snacks, and drinks. Whatever your needs, we have the right quality.

Cosmetics

For your cosmetic product, we offer a wide range of natural ingredients straight from nature. Our high-quality oils, fats, and waxes moisturise, nourish and add texture to your formulations.

We know: choosing the right ingredients makes all the difference. So we choose our raw materials carefully and use gentle manufacturing processes. Many of our oils also meet the requirements for organic and natural cosmetics, as confirmed by sustainability certifications such as COSMOS and NATRUE. Make a difference to your customers and the environment by choosing the sustainable alternative.

Natural ingredients for natural cosmetics

Pharma

Beginning with cod liver oil in 1925, our pharmaceutical portfolio today covers many applications, from pharmaceutical oils and food supplements to ready-to-use pharmacy supplies.

Naturally strong

As a partner to the pharmaceutical industry, we supply pharmaceutical wholesalers and dietary supplement manufacturers with high-quality raw materials that meet pharmacopoeia standards. Our oils, fats and waxes are used as a basis for medicines, ointments and creams and provide valuable nutrients for nutritional supplements. We are committed to quality assurance through rigorous testing in our own laboratory and third-party laboratories.

Pharmacy Range

More than just oils

Expertise to rely on: As an officially authorised pharmaceutical company we work to strict guidelines, the highest quality standards and many years of experience in pharmaceutical products. Our range includes cosmetic ingredients for consumers, natural ‚Amante' skincare oils, tinctures and disinfectants, in addition to medicinal oils and dietary supplements. Ideal starting materials for your custom formulations are our key oils and ointments.

Animal nutrition & care

Besides nourishing skin and coat, our natural oils provide valuable nutrients for a balanced pet diet. Discover our vegan algae options or our protein-rich press cakes, flours and texturates.

We can help you find the right mix for dogs, cats, horses and other animals – we supply our products as premixes, as compound feeds for your wet and dry food production, as supplementary feeds or as natural care products. Got a special product idea? As a Private Label partner, we can fill your innovation with our wide range of containers and closures.

Animal goodness

Chemistry & Technology

We find the right raw materials for your chemical and technical applications – versatile, functional, environmentally friendly. Whether as a base for traditional lubricants, in the manufacture of paints and varnishes, or as a carrier for chemical applications, our oils and greases are the right choice.

For high industrial demands

Oils and fats naturally have specific properties that are valuable for industrial use in the chemical and technical industries. Some are good lubricants or especially resistant to oxidation and high temperatures. Others have characteristics such as solubility or drying properties. To meet your individual requirements, we supply environmentally friendly raw materials directly from nature.

Production & Filling

For almost 100 years, we have produced for you with passion – in the widest variety of packaging, on seven filling lines in total. From bottles to tankers, we produce quality products to individual industrial and commercial specifications.

- Long-standing expertise in production & bottling
- Own Oil Mill Lipos
- Processed to the highest quality standards
- Variety of containers & sustainable packaging options

Working together for a sustainable future

Small changes can have a big impact: by switching to lightweight glass bottles, we save material and energy in production and can reduce our carbon footprint by 21 percent. Avoiding disposable plastic bottles also benefits the environment. More sustainable packaging is already the choice of many of our customers.

Will you join us?

Producing high quality using gentle methods

Nearly 8,000 tonnes of oilseeds are pressed into high-quality oils and press cakes each year at our Oil Mill Lipos – 90 percent of which is from certified organic cultivation.

The unique Lipos® cold-pressing and cooling process excludes heat and oxidation, protecting the valuable ingredients. The result is pure, brilliant oils of superior quality – made in Bremen.

Private Label

Got a product idea? We can make it happen! As a Private Label partner, we work with you from the initial idea through to making it happen. Together with you, we will develop your customised recipe and fill in accordance with certified standards.

You have numerous options with our wide range of containers and closures – both for consumers and for industrial processing. We are happy to support you with label design and regulatory testing through our internal quality assurance.

- Innovation based on years of expertise
- Tailor-made formulations for your target group
- Production to high quality standards
- Wide range of containers & sustainable packaging

Omega-3: Tailored to individual needs

Omega-3 fatty acids are essential components for humans and animals: they are important for the metabolism and an essential part of cell membranes. Many of our oils are naturally rich in the essential omega-3 fatty acids EPA, DHA or ALA. Together we will find the right blend for your specific requirements.

Our origins lie in marine oils – today you will also find a wide selection of vegan omega-3 oils in our range, for example based on algae. We gently press some of the corresponding plant seeds in our own Oil Mill Lipos.

Please feel free to contact us and discover our possibilities for individual blends, flavour components and concentrations.

Algae: Vegan superfood from water

Algae are among the oldest plant organisms on earth – and we think they are truly multi-talented! They provide important minerals such as magnesium and potassium as well as trace elements such as iodine. Some algae are excellent sources of the omega-3 fatty acids EPA and DHA, making them an ideal alternative to fish oils.

Algae grow many times faster than land plants and can protect the strained resource of fish – making them a sustainable superfood. Choosing algae products also supports a plant-based diet that is beneficial for the environment and climate.

Discover our variety of algae products now! We are also happy to realise your individual product ideas.
